## 📁 Employment History

### ● Senior Database/Full Stack Engineer - Lodi Unified School District, Lodi, CA

*May 2018 - Present*

- Managed the design and implementation of various web applications including a software eligibility system used by school sites to make purchase decisions and maintain vendor privacy agreements to ensure compliance with *The Student Data Privacy Constorium* (SDPC).
- Lead projects to migrate existing paper form processes to interactive web applications with scalable workflows.
- Met with stakeholders to determine goals and provide well-defined timelines to ensure full transparency.
- Created both internal and external facing documentation for other developers and end-users.
- Ensured proper development testing to minimize application downtime of maintenance and enhancement requests.
- Built re-usable Nuget packages and microservices to aid in Authorization, Logging, and Emailing.
- Created PowerBI reports to track enrollment, attendance, and special education case loads which all inform critical budget decisions.
- Responsible for maintaining the SQL databases behind the Student Information and Finance Systems.

### ● Systems Analyst II - Lodi Unified School District, Lodi, CA

*July 2016 - May 2018*

- Lead project that removed the pen-and-paper process of signing into professional development trainings by using the districts existing RFID staff badges.
- Provided quarterly training to teachers for specific modules in the Student Information System.
- Built SQL queries, views, stored procedures, and Python scripts to provide data to vendors via SFTP or HTTP requests.
- Implemented software that expedites over 28,000 students logging in to their applications that results in over an 8% increase in time available for learning.
- Created scripts and processes for the transportation department that streamlined the notification of guardians in case of accidents.

### ● PC Support Technician - Lodi Unified School District, Lodi, CA

*March 2015 - June 2016*

- Provided both remote and on-site technical assistance to end-users.
- Managed warehouse shipping and receiving, which entailed configuring and deploying district assets (Computers, Chromebooks, iPads, Projectors, etc.) to over fifty schools.
- Managed inventory at each of the school sites.
- Created Microsoft service to provide vital information from devices.

## 🎓 Education

### ● BA in Mathematics, concentration in Computer Science - Saint Mary's College of California

*December 2013*
